

Strategic Parenting: A Backward Design Approach to Elevating Humanity

Nate, the survivor of **8** ACEs (Adverse Childhood Experiences), prepares parents to rise above childhood trials and tribulations to help any child realize their hopes and dreams. Nate does so by sharing the 'Life Template', a backward design process enabling him to raise a multilingual son who left the country at **16** to chase a dream of playing professional soccer; receiving free education valued at more than **\$1.5** million, earning admission to **27** of America's best universities; earn fully funded fellowships to **7** of America's top graduate engineering programs; earning a Ph.D. in Electrical and Computer Engineering from Carnegie Mellon University; receiving MBA offers from **4** of America's leading business schools including a full-ride to NYU Stern's School of Business and more.
